

Figure 6 Brightnesses for a Quartz Square Barion P=43.0, C=30.0, t=50%

Results are better than for a Quartz Brilliant not as good as a CZ or Diamond Brilliant.

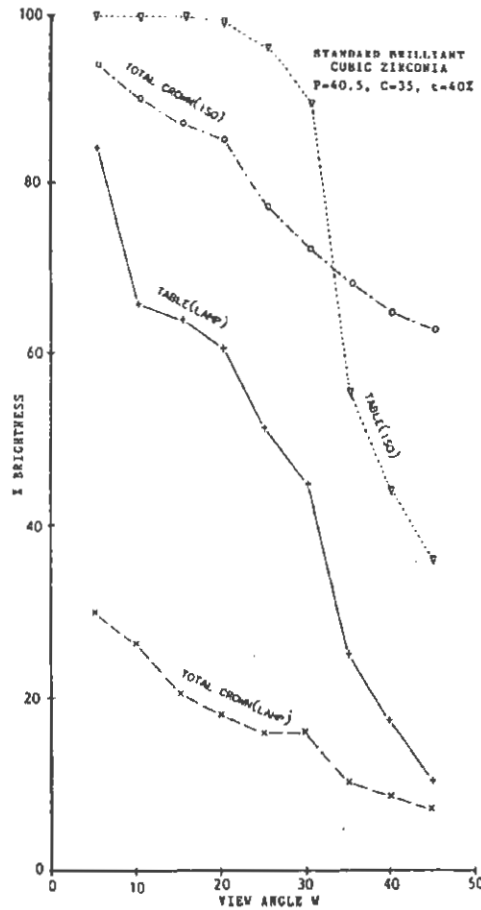

Figure 4 Brightnesses for a CZ Brilliant with P=40.5, C=35, t=40%.

Much more brightness and better "tippability" than with Quartz Brilliant.

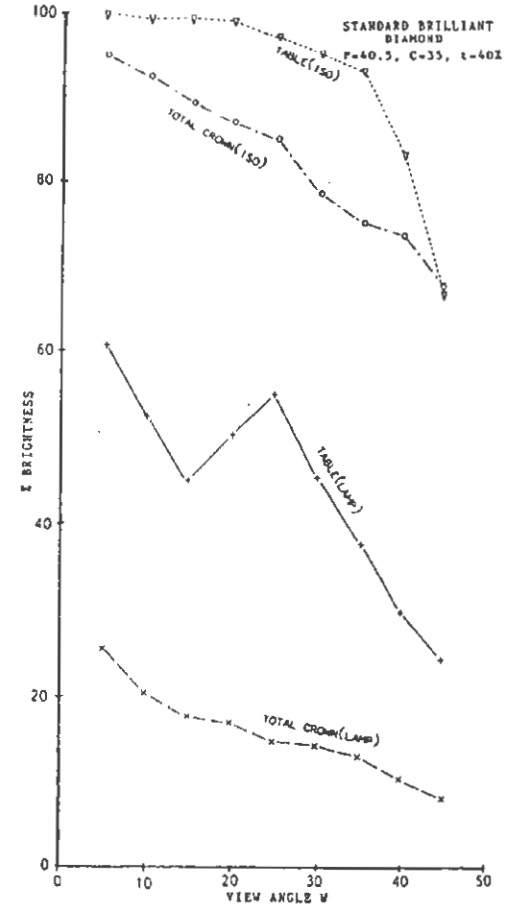

Figure 5 Brightnesses for a Diamond Brilliant with P=40.5, C=35, and t=40%

"Iso" condition is nearly the same as for a CZ Brilliant.
