Angle	CROWN INDEX
90	45 - 51 - 13 - 19
51.5	45 - 51 - 13 - 19
37	43 - 16
14	64 - 32

PAVILION

Angle	PAVILION INDEX
90	45 - 51 - 13 - 19
42	45 - 51 - 13 - 19
60	45 - 51 - 13 - 19
50	45 - 51 - 13 - 19

REMARKS: This cut appears as one of four small main stones in a commercial ring owned by Leleta Jones. These stones are only about 4 mm long. Since there is no published reference for this cut, there is no official name. For convenience, it has simply been labeled "LOZENGE VARIATION 29-2" because 29 is the Lozenge or diamond category in our index system and this is the second variation for the shape to be listed.

Angles are given for synthetic spinel and a 64- index.

In the test stone which I cut (from blue synthetic spinel) the girdle facet (at 90 degrees) was cut larger than the sketch shows to give more strength on the ends.
